## Services Available

---

Australian free to air satellite broadcasting brings superb digital quality ABC and SBS television and radio in all states plus commercial TV programming from the 7, 9 and 10 networks via their regional affiliates. All sound is in superb digital quality. When listening to these services directly by satellite, you'll realise the full benefits of digital reception. No more ghosting, interference, or putting up with poor reception!

---

### ABC programming including news and weather

The ABC has five separate television broadcasts. These services broadcast from Sydney, Brisbane, Adelaide, Darwin and Perth. Each state broadcast is responsible for their own programming, however, they may use the national feed from Sydney for all or part of their news broadcast.

### Seven Central

Seven Central is an independent regional station based in Townsville. With the aggregation of terrestrial services in Queensland operating since 1991, Seven Central's programs now provide all your favourite Seven Network programming with local insertions appropriate to their satellite audience. Their license covers the satellite delivery area east of the WA border. (For programs, see [www.scbnetwork.com.au/index.asp?pagename=tvguide.htm](http://www.scbnetwork.com.au/index.asp?pagename=tvguide.htm) and select the Southern Cross Central Option.)

### Imparja

Imparja is an independent channel based in Alice Springs and carries programming from the Nine and Ten Networks. Their license also covers satellite delivery area east of the WA border. (For programs, see [www.imparja.com.au/viewing.htm](http://www.imparja.com.au/viewing.htm))

### Golden West

Golden West is an independent channel operating out of Bunbury in Western Australia and serves the satellite audience in WA only. (For programs, see [www.gwn.com.au](http://www.gwn.com.au)).

### WIN

WIN is a channel Nine affiliated service, servicing their satellite audience in WA only. (For programs, see [www.winnet.com.au](http://www.winnet.com.au))

### SBS

SBS (Special Broadcasting Service) provides multi-cultural service in four time zones, with English

language coverage of world news, current affairs, documentaries, and serials.

### Narrowcast television services

A number of special interest free to air programs are available via narrowcast. These include special foreign language services such as Turkish, Dutch, Chinese, Saudi. Narrowcast services are transmitted from the B3 satellite, just one degree higher in elevation and ten degrees west of the C1 satellite, (where our normal free to air programs are transmitted).

### Narrowcast radio services

The new digital platform allows a multitude of radio services to be provided at a relatively low cost to the broadcaster. This has brought us specialised narrowcasting radio services such foreign language broadcasts in Dutch, Arabic, Tamil and others.

### Conditional access

Viewers should be aware that all Australian broadcasting on satellite is conditional access. Please note:

BBC World (radio) broadcasts only to non commercial users;

ABC TV will restrict broadcasts of special events that are time zone sensitive, such as election coverage;

ABC Radio will provide you with access to the programs (state and national) designated for the state you've registered in.

### Satellite commercial service areas

It is important to understand that the four satellite commercial operators have licensed areas just like terrestrial (local antenna) operators, but there is a difference, satellite signals cover the whole of Australia so the viewing is controlled by the Smart Card, just like Pay TV, but without paying.

Satellite signals are receivable anywhere in Australia subject to broadcaster's licence conditions. If you are in doubt about coverage from any particular broadcaster, please discuss this with us.

not pre-authorised. We carry out your additional programming and card authorisation when your order is processed. PLEASE NOTE: Foxtel and Austar can only be received with the provider's card and receiver.

**Programming note**

As delivered your Campersat equipment is programmed for standard services and your card is
